## Idaho State Communications Center Hazmat H-2012-00261

	11/28/2012 15:35 11/28/2012 15:36	Loni HazMat Coordinator	ISP Region 5 ITD District 5	Main Office Email	Acknowledged Emailed	Brown, Jennifer Brown, Jennifer
Date/Time  Note  Clint Humpherys from Nu-West Industries, doing business as, Conda Phosphate Industries advised that while drilling a monitoring well on November 3, 2012 in the morning they found elevated levels of sulfate, nitrate, phosphate, cadmium and chromium along with a low Ph level. The drilling was taking place at the request of the EPA Region 10 in conjunction with a 3013 order to investigate previous impacts to this site. On November 5, Peter Magolske from the Environmental Protection Agency (EPA) and Brian Monson from the Boise office of the Dept. of Environmental Quality (DEQ) were both notified of these findings.  They are currently investigating all their equipment and piping to see if there are any indications of an on-going release, however they do not believe that there is any release at this time.  11/28/2012 15:23  Initial Bridge with Dave Jackson, BHS and Gayle Osburn, DEQ Lewiston, and Jennifer Brown, State Comm. Dave and Gayle were updated on the phone call received and advised that NRC Report #1031792 has just come in also.  At 1527 hours, Dave Jackson classified this as a regulatory hazmat and Gayle Osburn concurred. The DEQ Regional office will be contacted to do follow-up. State Comm will scan the NRC Report and attach it to the Hazmat Report when it is emailed.  Call ended at 1529 hours.  Call ended at 1529 hours.  Called Clint Humpherys and advised him that there will be continued  Brown, Jennifer		Calvin Terada	•		•	Brown, Jennifer Brown, Jennifer
